

Announcing a New Student Text for Ag Biology Courses

BIOLOGICAL SCIENCE AND AGRICULTURE

Biological Science and Agriculture links biology concepts with agricultural practices. It is organized into four units of study. The first unit leads students through an overview of scientific research, research methods, reporting research, and safety practices in the laboratory. The second unit encompasses plant science topics including cellular processes, reproduction, photosynthesis, plant nutrition, growth and development, and the environment. The third unit deals with animal genetics, growth, nutrition, health, reproduction, and a chapter on aquaculture. The final unit focuses on food science including handling and storage, food additives, processing, and the physical and chemical properties of food.

ISBN: 0-9761445-1-4

Biological Science and Agriculture was written to accompany the BSAA Lesson Plan Library CD-ROM. Each lesson from the CD is addressed in the text via laboratory exploration sections. The text is directly tied to laboratory activities that enhance student understanding of the concepts.

Biological Science and Agriculture is a full color textbook written at a level that students can understand. It features hundreds of photos and detailed illustrations that enhance the content. Each chapter has been formatted to be both attractive and educationally sound. The student learning objectives for each chapter are clearly stated and presented. Numerous end of chapter questions allow for assessment of the content.

Accompanying Teacher's Manual available free at www.caert.net

Michael G. White, and Eric B. Reutter

Available from CAERT, Inc.

Contents:

UNIT ONE: SCIENTIFIC INVESTIGATION

1. Introduction to Biological Science Applications in Agriculture
2. The Process of Experimentation
3. Reporting Research Findings
4. Safety in the Research Laboratory

UNIT TWO: PLANT SCIENCE

5. Basic Principles in Plant Science
6. The Plant Cell and Molecular Biology
7. Reproduction in Plants
8. Seed Germination
9. Photosynthesis and Respiration
10. Plant Growth and Development
11. Nutrients for Plant Growth
12. Plant Science and Ecology

UNIT THREE: ANIMAL SCIENCE

13. Animal Genetics and Biotechnology
14. Growth and Development of Animals
15. Animal Digestion and Nutrition
16. Animal Health
17. Animal Reproduction
18. Aquaculture

UNIT FOUR: FOOD SCIENCE

19. Handling and Storing Food Products
20. Food Additives and Preservation
21. Processing and Preserving Meat Products
22. Processing and Preserving Dairy Products
23. Physical Properties of Food and Processing Systems
24. Chemical Properties of Food and Processing Systems
